

POPULATION HEALTH

Up to 9% of your Medicare revenue is at risk

Under MACRA, 92% of eligible clinicians are projected to fall into the Merit-based Incentive Payment System (MIPS).

You are at risk for up to 4% of your Medicare payments in January 2019, up to 9% in 2022 and beyond.

The 2017 performance period is underway and you'll need to send in data by March 31, 2018. Have you picked your pace?

turn risk into reward

Let Premier's end-to-end solution guide you, making optimizing reimbursement under MIPS as easy as...

01

Assess and design

Let us help you assess your potential impact and opportunity under MIPS and custom design a roadmap that sets you up for success.

02

Collect, calculate and submit

Let us take the MIPS reporting burden off your hands - aggregating, analyzing, calculating and submitting on your behalf. With both enterprise and self-service reporting options, we have a model that meets your needs and budget.

03

Optimize performance

With a roadmap in hand and reporting taken care of, you can focus on optimizing the performance of your clinicians in the MIPS program with a cross-continuum view of performance and a collaborative network of peers.

POPULATION HEALTH

01 Assess and design

Build a Sustainable Roadmap for MACRA – Premier's Best in KLAS value-based care consulting team has established a proprietary framework to help you design a customized roadmap for MACRA. Included is a thorough analysis and critique of your current performance and a financial model to help determine your best path forward.

MIPS Opportunity Assessment & Design Workshop – Premier will provide you with a customized report on your eligibility, reporting criteria and potential upside or impact in the MIPS program. We will co-develop a measurement strategy that will enable your organization and employed providers and/or clinically integrated network to perform optimally and better than your local competition.

As the leading provider of PQRS reporting, no one is better equipped to help you prepare for and transition to value-based care. Medicare ACOs participating in our Population Health Management Collaborative have consistently outperformed their peers in both reducing costs and improving quality.

02 Collect, calculate and submit

Enterprise Reporting – Premier offers a full service solution for MIPS reporting through our Clinical Performance Registry. Provider groups with one or more electronic data sources can enjoy automated data feeds and select from hundreds of measures (including those required by MIPS), all managed at the enterprise level.

Self-Service Reporting – Ideal for small group or solo providers, Premier offers a self-service portal for MIPS reporting. Data sources can be paper records or EHRs with limited data extract capabilities, and data can be submitted via manual entry or file upload.

03 Optimize performance

Clinician Performance Management – Performance information on all clinicians in your network, across the continuum and all in one place. With network, service line and clinician views, anyone can get involved in improving performance and optimizing reimbursement under MIPS.

Collaborative Framework & Consulting Services – The benefit of a partnership with Premier is that you never have to go at it alone. Whether your organization taps into the collective knowledge and lessons learned from our QUEST® and Population Health collaboratives, or you receive help from one of our Best in KLAS value-based care consultants to design a program, we have you covered.
