PQRS wizard Measures Group Reporting

Reporting Method: Measures Groups

- You can select the measures group of your choice from the listing on the reporting details page.
- When you click on the title of any one of these measure modules to view Measures Group information
 - Measure Descriptions
 - Patient age range
 - Diagnosis, encounter, or procedure codes which qualify a patient for that measure's denominator

The screenshot shows the 'PQRS Measures Group Reporting' page. At the top, there is a navigation bar with links for Home, Products, Penalties & Incentives, How It Works, Partners, and Support, along with a 'Sign In' button. The main heading is 'PQRS Measures Group Reporting' with a sub-heading '\$299 per provider'. Below this, a message states: 'Registering more than 10 providers? Groups of 10 or more are eligible for a discount. Your group discount form will be available soon.'

Eligible individual providers can select Measures Group reporting to satisfy their 2016 PQRS requirements. This reporting option is only available through registry reporting in 2016. See the full list of available 2016 Measures Groups below.

- Select just ONE Measures Group per provider to satisfy PQRS requirements!
- Report on 20 of your patients seen in 2016, 11 of which must be Medicare part B Fee-For Service (FFS) patients (see measures group details for eligibility).
- Real-time data feedback through PQRSwizard
- Avoid 2% Penalty in 2018!

The page displays a grid of 20 measures groups, each in a button-like format with a right-pointing arrow:

Acute Otitis Externa (AOE)	Hepatitis C
Asthma	HIV/AIDS
Cardiovascular Prevention	Inflammatory Bowel Disease (IBD)
Cataracts	Multiple Chronic Conditions
Chronic Kidney Disease (CKD)	Oncology
Chronic Obstructive Pulmonary Disease (COPD)	Optimizing Patient Exposure to Ionizing Radiation
Coronary Artery Bypass Graft (CABG)	Parkinson's Disease
Coronary Artery Disease (CAD)	Preventive Care
Dementia	Rheumatoid Arthritis (RA)
Diabetes	Sinusitis
Diabetic Retinopathy	Sleep Apnea
General Surgery	Total Knee Replacement
Heart Failure (HF)	

Measures Group Reporting Requirements

How do I know which patients to select?

If you would like to report on this measures group, you will need to:

1. Enter data for 20 patients, the majority of whom must be Medicare Part B FFS patients aged 18 through 75 years.
This includes traditional Medicare FFS patients, Railroad Retirement Board beneficiaries and Medicare Secondary Payer Beneficiaries. Medicare Advantage beneficiaries are NOT eligible for PQRS reporting.
2. Select patient visits that have an eligible Diabetes diagnosis code billed in 2016 (January 1 - December 31, 2016) accompanied by a patient aged 18 through 75 years with an eligible patient encounter code. Click below for a list of eligible diagnosis and patient encounter codes.

3. Measure #110 only needs to be reported a minimum of once during the reporting period when the patient's visit included in the patient sample population is between January and March for the 2015-2016 influenza season OR between October and December for the 2016-2017 influenza season. When the patient's office visit is between April and September, Measure #110 is not applicable and will not affect the eligible provider's reporting or performance rate.
4. Measure #126 is not reported (does not apply) when the clinician documented that patient was not an eligible candidate for lower extremity neurological exam measure, for example patient bilateral amputee, patient has condition that would not allow them to accurately respond to a neurological exam (dementia, Alzheimer's, etc.), patient has previously documented diabetic peripheral neuropathy with loss of protective sensation.
5. Satisfy and report each measure within the measures group at least one time. CMS guidelines indicate that each measure you report must have a performance rate greater than 0% (less than 100% for inverse measures). [Learn More](#)

What measures do I need to report?

To successfully report on this measures group, you will need to satisfy the measures listed below. Click on the measure title for more information.

- PQRS Measure #1
Diabetes: Hemoglobin A1c Poor Control
Percentage of patients 18-75 years of age with diabetes who had hemoglobin A1c > 9.0% during the measurement period.
NOTE: This is an inverse measure, so a lower performance rate is better! To satisfy this measure, you must have a performance rate less than 100%.

2016 Diabetes Measures Group Patient Visit Form

Please complete the form below for 20 or more unique patients meeting patient sample criteria for the measures group. For majority (11 or more) patients must be Medicare Part B Fee-For-Service (FFS) beneficiaries. Measures groups containing performance rate (100% for measures where a lower rate indicates better performance) will not be counted as satisfactory group. (For more details and exceptions, see the PQRS measure specification at www.cms.gov/pqrs).

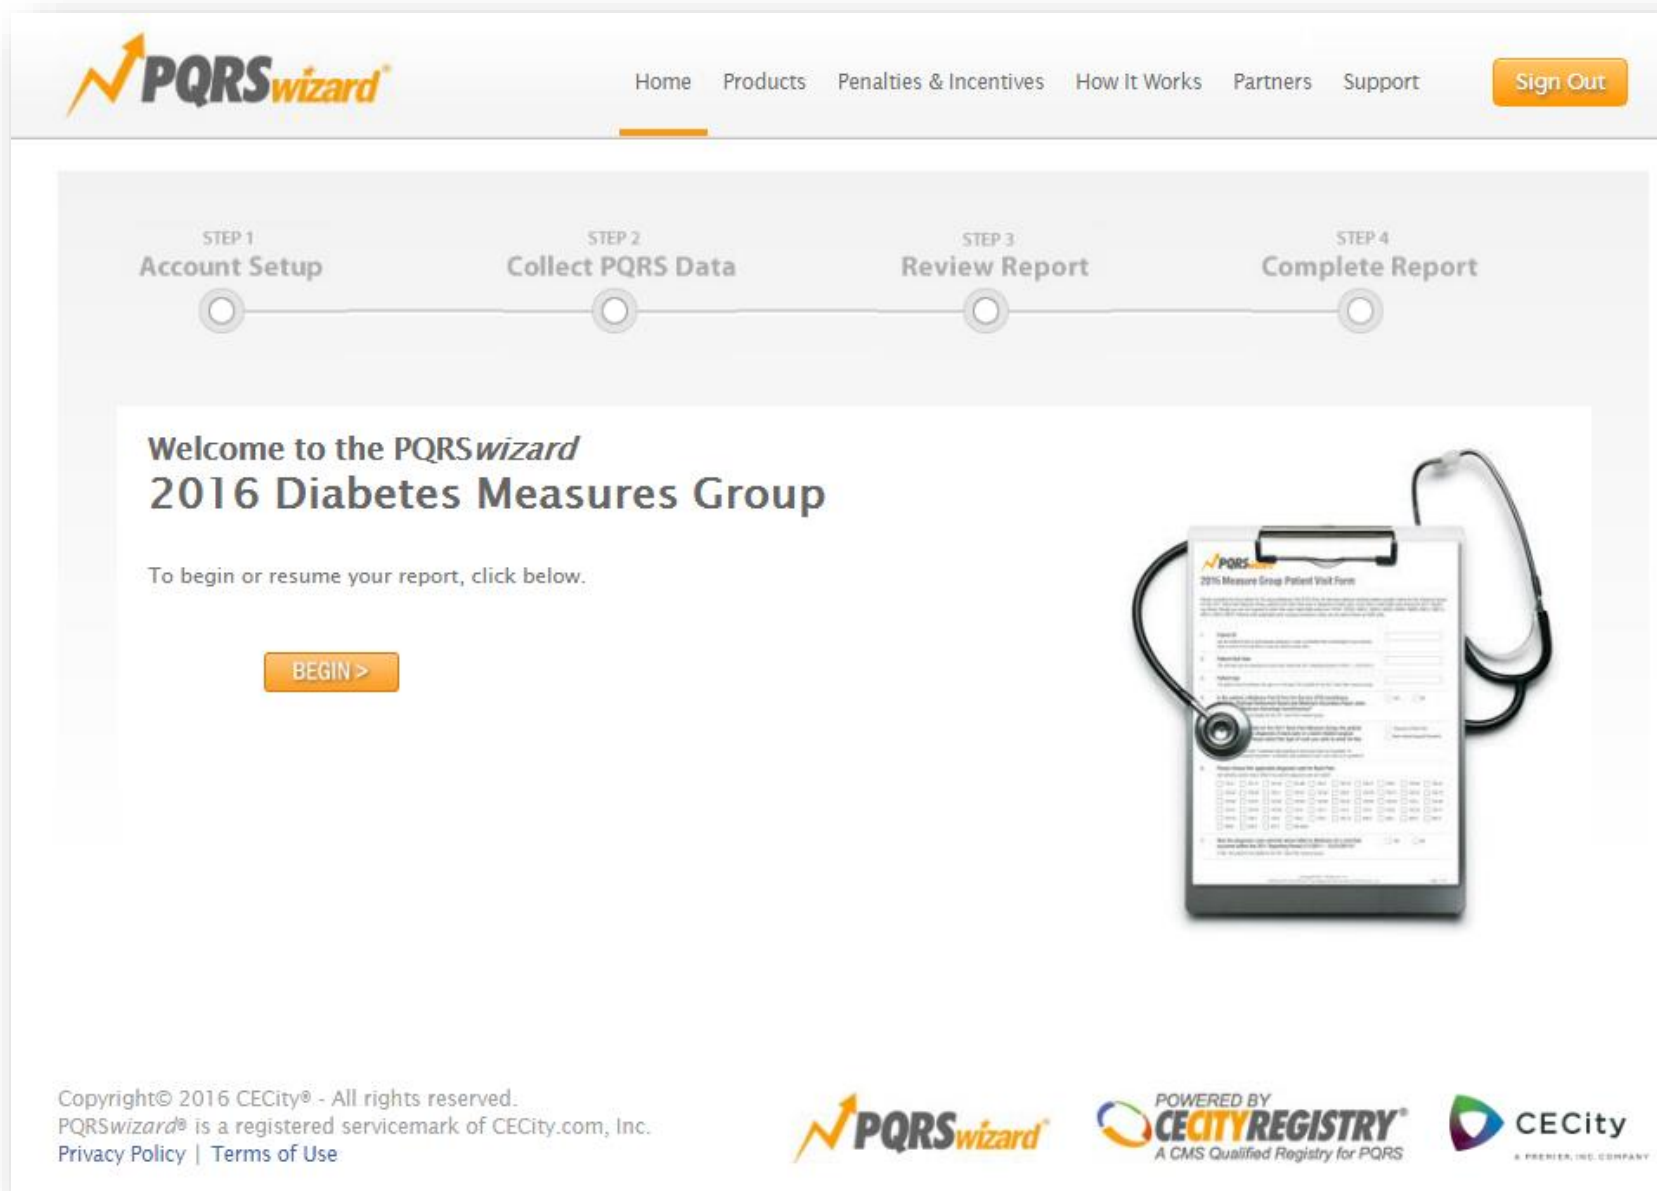

1. **Patient ID**
Use the Patient ID that is automatically assigned, or enter an identifier that is meaningful to your practice. Keep a record of this identifier in case you need to make edits.
2. **Patient Visit Date**
If not in the 2016 Reporting Period, encounter is not eligible for this measures group and therefore you do not need to complete the rest of the form.
3. **Patient Age**
If <18 or >75, encounter is not eligible for this measures group and therefore you do not need to complete the rest of the form.
4. **Is the patient a Medicare Part B (FFS) beneficiary (includes Railroad Retirement Board, Medicare Secondary Payer and Critical Access Centers)**

How to Collect and Enter Your Data

PQRSwizard's simple, online questionnaire will help you to collect all of the necessary data. The PQRSwizard Progress Monitor will track your data against the reporting requirements as you enter each patient. As you enter patients, you will automatically build your PQRSwizard Patient Registry.

Data can be entered in three ways:

1. If you are participating in a Continuous Registry, you are able to extract your data from an already existing patient list by using the "Extract Data". If you are interested in participating in a continuous registry, click [here](#) to contact CECity for more information about Continuous Reporting and Performance Improvement.
2. You can manually enter data into PQRSwizard by using the "Enter Data" tab [NOTE: Data entered here will not transfer back into any other registry. If you would like to enter additional patients to an already existing registry, please do so within your registry then extract the data into PQRSwizard.]
3. Upload your data using our downloadable template and definition file which can be accessed from within the "Upload Data" tab.

My PQRSwizard Performance Report

- The performance rates (%) below indicate your performance based on the data that you provided to PQRSwizard for the measures selected.
- If you have any questions about eligibility based on your performance rates you can review the CMS FAQ.

NOTE: Measure #105: Hemoglobin A1c Poor Control (NQF 0059) is an inverse measure. A lower calculated performance rate for this measure indicates better clinical care or control.

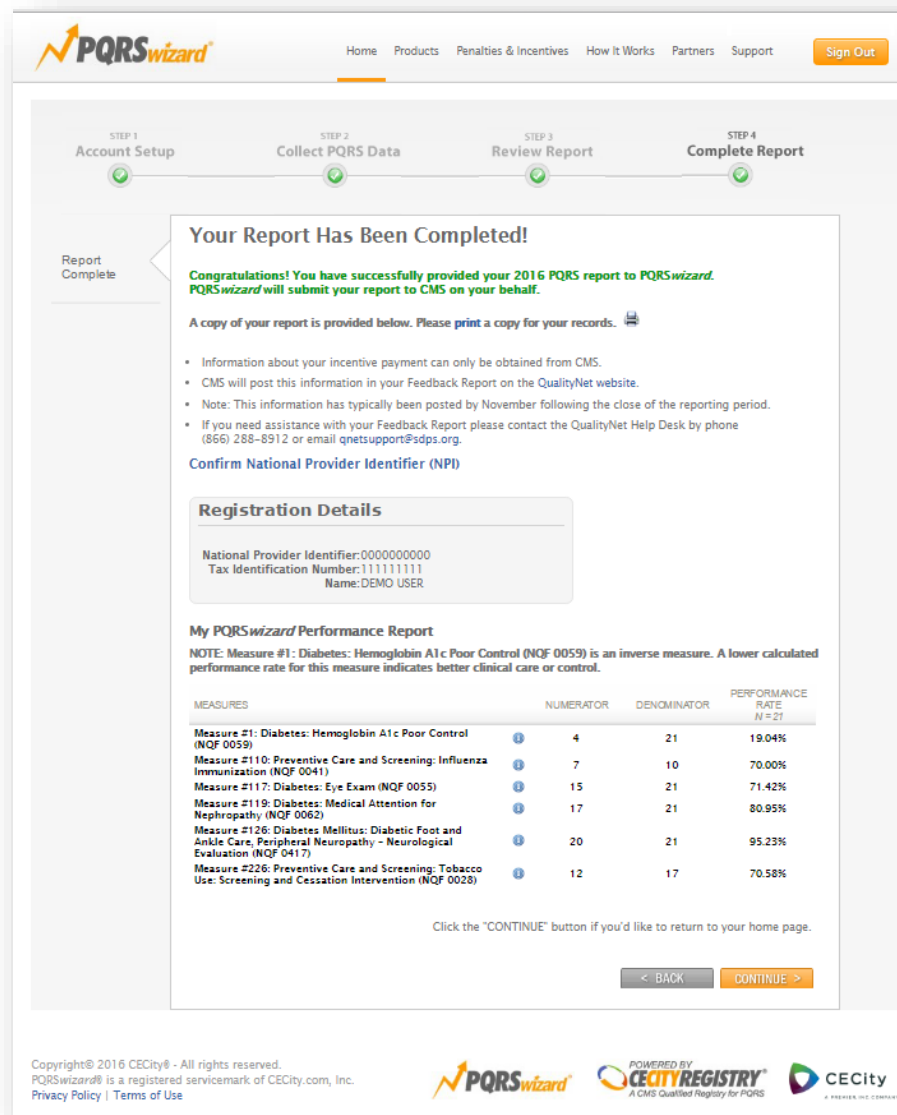

MEASURES	NUMERATOR	DENOMINATOR	PERFORMANCE RATE N = 21
Measure #1: Diabetes: Hemoglobin A1c Poor Control (NQF 0059)	4	21	19.04%
Measure #110: Preventive Care and Screening: Influenza Immunization (NQF 0041)	7	10	70.00%
Measure #117: Diabetes: Eye Exam (NQF 0055)	15	21	71.42%
